Vikoflex Boom is a curtain boom with internal foam buoyancy. It is suitable for oil spill response or for permanent installation. It is robust, easy to deploy and is suitable for calm protected waters. It is resistant to sunlight, hydrocarbons and rough treatment while being durable and easy to clean.

Vikoflex Boom is designed for use in calm water environments such as rivers, intakes, harbours and nearshore applications. The boom is available in various sizes to suit the customer's needs.

Vikoflex Boom is constructed of high grade PVC coated fabric, with foam flotation and vertical fibreglass stiffeners. The boom is manufactured in 5m - 25m sections which can be connected with steel U bolts, Unicon or ASTM connectors on request.

For easy handling Vikoflex Boom is fitted with handles and quick couplings at the top and bottom edges providing attachment points for use with external tension lines for use in higher currents.

The boom can be supplied in aluminium crates for compact storage, which can be stacked one on top of the other. Vikoflex Boom can be deployed direct from the crate, or from a reel.

#### Product Benefits:

- Simple and fast to deploy and recover
- Strong flexible boom
- Easy to clean

	Application	Height mm	Freeboard mm	Draft mm	Standard Section Lengths
<b>Vikoflex Boom 350</b>	Calm Water, Rivers, Lakes, Ports & Harbours	350	150	200	5m - 25m
<b>Vikoflex Boom 500</b>	Calm Water, Rivers, Lakes, Ports & Harbours	500	200	300	5m - 25m
<b>Vikoflex Boom 650</b>	Calm Water, Protected Water, Rivers, Lakes, Ports & Harbours	650	225	425	5m - 25m
<b>Vikoflex Boom 750</b>	Calm Water, Protected Water, Rivers, Lakes, Ports & Harbours	750	250	500	5m - 25m
