

# Enviro Skimmer

# VIKOMA

Protecting our environment over 50 years

A portable skimmer ideally suited for plastics, nurdles, weed and grass recovery

- Able to recover small floating debris (nurdles, plastics, weed etc.)
- Simple and easy to use
- For use on beaches, canals, rivers, lakes and ponds
- Clears nurdles, weed and grass etc. and protects fish and other wildlife
- Filtration unit for collection of waste and easy disposal
- Lightweight and portable

The Vikoma Enviro Skimmer is a weir skimmer working alongside a filtration system designed to recover floating nurdles and plastics as well as weed and grasses from shorelines, rivers, canals and ponds.

Plastics pollution such as spilt nurdles are becoming an increasing global problem, as is weed growth and water fern. They can cover the entire surface of a canal, pond or lake if not managed, blocking out light to submerged aquatic plants. It also leads to reduced levels of oxygen in the water which is a problem for fish and other wildlife.

The Vikoma Enviro Skimmer is an easy way to remove floating plastic nurdles or weed and grasses to clear the water surface. The debris (nurdles, plastics, weed and grasses etc.) are recovered by the skimmer's weir action and collected into an efficient filtration/collection system, draining the water for return to the sea, canal, river, pond or lake. Collected nurdles/plastics can be recycled and weed and grasses can be collected and composted or disposed of as desired.

The skimmer can operate in shallow or deep water. The compact design allows the system to operate in small as well as large areas and it is suited to any calm water.

The buoyancy floats are made from a strong and durable plastic. The system comprises a suction weir skimmer coupled to a diesel driven

pump with hoses, coupling and floats and an in-line filtration system. Our high performance transfer pump is key to an effective system.

Product benefits:

- Able to recover a wide range of floating pollutants
- Ideal for shallow or deep waters
- Simple to operate

#### Maximum Recovery Capacity

Up to 17m<sup>3</sup> per hour

#### System Components

Vikoma Enviro skimmer head  
Diesel driven V164D Transfer pump with spark arrestor and Automatic overspeed shutdown  
Weed filtration system  
Hose kit

#### Optional Extras

Spares Kit  
Extension hoses  
Adaptor for Mini Pump
