A versatile weir skimmer ideally suited for difficult to reach areas such as access holes, sumps and pits and can be packaged on a trolley for easy storage and manoeuvrability.

Drainage sumps, deep access holes and waste water retention pits can often be difficult to reach using traditional skimmers, but not anymore with Dragonfly Micro which has been designed with these jobs in mind.

Dragonfly Micro is a compact weir skimming system that can be supplied on a sack type trolley, making it easy to move around and quick to deploy.

The depth of the circular weir is controlled by a float unit situated in the oil collection trough, the control of which is dependent on pump action.

A tripod is also available for easy and safe deployment and recovery of the skimmer from an access hole.

**Product Benefits:**

- Fits access holes
- Small, lightweight and versatile
- Easy to manoeuvre

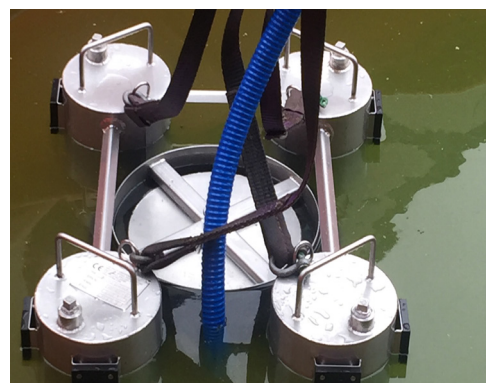

<b>Recovery Capacity</b>
Up to 5m <sup>3</sup> per hour
<b>Trolley System components</b>
Dragonfly Micro skimmer Pneumatic pump Hose set Tripod for recovery & deployment Trolley for transportation & storage Other pump options available
<b>Dimensions</b>
67cm (L) x 52cm (W) x 28.5cm (D)
