

## LEAKAGE & OVERFILL SENSORS « MAXIMAT »

*Protecting people and environment*

**Overflow, leak, and ground leakage sensors** are essential safety tools for any industry working with double-walled tanks or hazardous liquids. These sensors provide early detection of potential leaks or overflows. Incorporating them into your safety systems not only ensures **regulatory compliance** but also minimizes risk, **protecting both your assets and the surrounding environment**.

“MAXIMAT” leak and overflow detection sensors from BAMO are backed by key international certifications, ensuring high safety and compliance standards, as well as our commitment to meet regulatory requirements across various global markets. These include :

- the **General Building Supervisory Approval** issued by DIBt (Z-65.13-494 & Z-65.40-496),
- the **Certification of Product Approval** by SVTI ASIT (KVU-Nr. 302.019 & 321.012),
- the **Vlarem II certificate** issued by Corcon bvba (CP0724/3140-HCC001 & CP0724/4070-HCC001),
- the **GOST-Clearance Certificate** (42 1300/9026 10 290 0).

Do not hesitate to address us your specific needs.

Sincerely,  
Risborg ApS
