

# Rulers with limnimetric scales

## EL

- **Metallic rulers for level indication in basins, rivers, harbours**
- **Mounting: vertical, or 45° angle**
- **Easy reading on large scale**
- **Resistant to corrosion, climate strengths and seawater**

### APPLICATIONS

Direct reading of level in dams, reservoirs, basins, rivers, etc.  
Highly resistant to corrosion, sea water and climate strengths

### DESCRIPTION

Limnimetric scales on rulers, vertical or at 45° angle, are designed for use in rivers, lakes, lagoons, harbours, dams, channels, etc. Robustly constructed, our cast aluminum rulers resist to damages from highly charged water as well as from corrosive seawater.

The basic module with scale and figures is made in one piece with a total width of 15 cm. The ruler is delivered per elements of 1 meter each, graduated in centimetres with values every decimeter. Each section has two slotted holes at each ends which facilitate adjustment on site.

### Benefits:

- **Easy to install**

Installation is simple with two slotted holes at both ends of each section.

- **Long lifetime**

The ruler is made of a high performance light alloy which guarantees a long service life compared to traditional rulers made of plastic or enamelled sheet of metal.

- **Heavy duty rulers**

Each module with graduated scale and figures is made of one piece. This design guarantees perfect resistance of the inscriptions even after extreme cold weathers with ice on the ruler.

- **Modular**

The sets are supplied in 1 meter sections allowing replacement of a section that have been damaged (by ships for instance).

## TECHNICAL FEATURES

Mounting	Vertical or with a slope of 45° according the type
Material	Cast aluminum
Width	15 cm (Other on request)
Thickness	7 mm (plate 5 mm + characters 2 mm)
Mass	2.5 kg/m
Scale	Standard: graduated in cm and figures each dm Other on request (customized)
Plastic coating paint	Polyester-isocyanate
Colours	Graduations & figures: black on yellow base Other on request

## CODE NUMBERS AND REFERENCES

Code	Reference	Description
581 010	EL/V	Vertical limnimetric scale (marks and figures: black on yellow base)
581 020	EL/I	45° limnimetric scale (marks and figures: black on yellow base)
